PROFILE

16-year-old founder and full-stack/mobile developer building real digital products from idea to launch. I work across product strategy, UX/UI, frontend, backend, databases, Android/iOS product flows, testing, performance and launch preparation. Creator of Ustohona.tj and TajLife.tj.

FOUNDER-BUILT PRODUCTS

Ustohona.tj

Two-sided service marketplace connecting customers with local professionals: categories, requests, offers, profiles, chat/calls and 1-5★ reviews.

Verified facts: 100% free core access • real mobile UI

TajLife.tj

Multi-service digital ecosystem with 34 documented service areas, multilingual information architecture and structured public discovery.

Verified facts: 34 areas • Tajik / Russian / English

DELIVERY

Web platforms

Responsive products, marketplaces, dashboards and portals.

Android apps

Mobile flows, APIs, authentication, data and notifications.

iOS apps

Professional iPhone/iOS product experiences and integrations.

End-to-end

Discovery → UX/UI → frontend → backend → database → QA → launch.

TECHNICAL FOCUS

- React • Next.js • TypeScript • JavaScript
- Node.js • Python • REST APIs
- PostgreSQL • MongoDB
- Responsive UI • Mobile UX • Accessibility
- SEO • Performance • Analytics-ready delivery
- Docker • AWS • Git • Figma

CASE-STUDY PROCESS

01 Problem

Understand the user, market and friction.

02 Role

Define ownership, scope and responsibilities.

03 Architecture

Design product flows and system structure.

04 Decisions

Choose tradeoffs for trust, speed and scale.

05 Build

Implement, test, optimize and integrate.

06 Result

Publish only verified outcomes and product facts.

FAST EXECUTION

Selected, tightly scoped MVPs and launch-ready prototypes can often be delivered in roughly 3-7 days. Larger systems are estimated by scope, integrations, content and testing requirements.
